Neighbor City Butts in Our Annual Stampede

Chamber of Commerce Decides
To Oppose Redcliff

According to announcement in the Medicine Hat News last week-end the Chamber of Commerce of that city has decided to arrange for a celebration there on Dominion Day.

For the past ten years the 1st of July has been recognized throughout this district as Redcliff's annual celebration and on every annual celebration we have had a stampede and sports program which has been a credit not only to the town but to the district as a whole. For the past few years the Stampede Committee here has worked in conjunction with the young peoples' athletic organization in Medicine Hat and has gone to considerable trouble and expense in arranging a place for them on the day's program. Owing to its nearness to Medicine Hat, and its monthly payroll of approximately \$25,000 a month, Redcliff is one of Medicine Hat's best customers not only for the merchants, and professional men but also for all kinds of amusements, carnivals and sports.

Taking all this into consideration it looks like a lack of gratitude or sportsmanship or forethought on the part of the Chamber of Commerce in Medicine Hat, in new and put on something on Dominion Day in opposition to Redcliff which has had this day as its annual event for the past ten years.

However we understand it is the opinion of many of the local Association members to go on with the Stampede as usual this year. The question will finally be decided upon at a meeting to be held on Tuesday, March 10th.

Mr. Robt. Johnson is seriously ill in the Medicine Hat hospital, suffering from pneumonia.

There will be a grand children concert in the Gordon Memorial Basement, on Friday April 3rd. Watch for particulars.

Mrs. R. S. Hodge was the guest of honor at a delightful bridge party given on Tuesday evening by Mrs. J. R. Cann.

Mr. and Mrs. R. S. Hodge leave next Monday for England where they will visit Mr. Hodge's mother and family for a few months.

Messrs. B. Allison, J. Hope and W. Waters are supported as jurymen for the sessions in Medicine Hat this week. As there were no jury cases on the docket all the jurymen were dismissed.

The Range Experimental Station at Manberry, recommends the feeding of linseed oil cake to stock in order to make rough feed go farther during cold weather. For mature cattle 1 pound of oilcake will replace 5 to 6 pounds of hay. This can be maintained on 10 to 12 pounds of good quality hay and 1 pound of oilcake per day.

Back of Cold Spell In Now Badly Broken

Chinook Has Relieved a Most Serious Situation

The long looked for chinook came at last and it came with a vengeance. When the chinook commenced last Sunday the ground in all directions was covered with about two feet of snow. So mild was the weather and balmy the wind, that by Monday morning the bear ground and prairie grass was blowing up and a stream of water flowing in all directions.

This welcome change in the weather has relieved considerable anxiety among farmers and ranchers as feed conditions for stock were getting very serious. If cold weather had continued much longer there certainly would have been a serious loss among horses, cattle and sheep.

With the country roads blocked for the past three weeks the fuel and groceries problem was also becoming serious in outlying districts.

It is several years since this district has experienced a cold spell and such a lack of periodical chinooks.

Appointed A Judge

W. R. HOWSON, K. C.

Leader of the Liberal party in Alberta who has been appointed a Justice of the Alberta Supreme Court in succession to the late Justice J. R. Boyle, who died three weeks ago.

Letter to the Editor

Editor The Review:

It was obvious not so much that the School Trustees were afraid of losing their power, nor that they underestimated the possible benefits of bigger school units, which caused them to turn down the new school plan, (which was in the main the old Baker plan) but it was the disappointment, when on Monday evening, from the mouth of the Premier himself, they learned how immature and incomplete the plan really was.

The opposition against "what was as strong from the rural trustees as it was from the urban. The delegates from the rural districts stated that the new plan would not help them any, as conditions are first, because of the lack of roads—secondly because of the lack of money—and thirdly because of the infirmity of the weather in winter when even good roads are impassable often for a week at a time.

One school trustee said that it would be seven miles to school in his district. Another stated that it would be twenty-six miles in his district.

Delegates wanted to know how they could finance such a scheme; they challenged the Premier's statement that the larger units would reduce costs.

As for the proposal to build high schools with dormitories out in the rural districts, it was stated that parents who can afford it now send their children to city schools; and that parents would feel safer to let their children board in private homes in the city.

It is satisfactory to know that the Premier will let the new School Act be deferred until the 1937 session of the legislature. That gives people time to think over and plan it better. In the mean time it is voluntary—those districts which want to try out the new plan are free to do so.

Yours sincerely
O. Vogstad.

Mrs. W. J. Cameron was the hostess at a delightful afternoon tea given in honor of Mrs. R. S. Hodge on Wednesday. Among the guests was Mrs. Jack Potter of Medicine Hat who is visiting with Mrs. Hodge at present.

S. C. Budget Increases Taxes In Many Lines

'Will Still... be a Deficit of \$2,549,044.89

In the legislature last Monday Hon. Chas. Cockcroft, Provincial Treasurer, delivered the first Social Credit Budget in the history of the world.

The budget forecasts increased and additional taxes in several lines. Among these will be a new Sales Tax on the basis of 2% of all commodities sold; higher income tax and a social service tax; annual auto driver's license; increase in the fuel oil tax.

In outlining the financial position of the province, Mr. Cockcroft stated the estimated deficit for the fiscal year ending March 31st, 1936 was \$5,780,500. After providing for increased revenue totalling \$5,268,618.75 by way of new taxes, increases in existing taxation he government budgeting for a total deficit of \$2,549,044.89 in both income and capital account for the fiscal year ending March 31, 1937.

In the budget no provision was made for Social Credit dividends.

With 81,000 Scouts, Canada is the fifth largest Boy Scout country in the world.

"The business man who doesn't advertise is like the fellow who sinks at his girl in the dark—he knows what he is doing, but nobody else does."

A Glauher Salt mine has been discovered near Oyen, west of here. The sample tests 95 per cent pure. So far three hundred tons have been taken out of the mine.

Last Saturday evening a number of friends met at the home of Mr. and Mrs. R. S. Hodge and gave them a surprise. The event was a farewell for Mr. and Mrs. Hodge who are leaving this week end for England where they will spend a few months visiting Mr. Hodge's mother and family. A very pleasant evening was spent.

LIBERTY'S CANADIAN HALL OF FAME No. 3

Stephan Bisset-Lee, economist and journalist, told for his honor and paid four times as much for it by those who have seen it than for his economy by the students of McGill University, where he made the payment of \$100,000 for a statue of a native or Canadian. He said he had been told the price of all anti-Canadianism and the envy of many a nationalist. Right extensions of such have been born in it. Like Mark Twain and Charles Dickens and has written about such a lot of times. He has been for a number of years of twenty years or more ago. Writes in the morning letters after lunch with the new after dinner. One of the best of the best of the best.

Freshets Damage Grade to the Hat

Floods Drive Gravel into the Side Ditches

The chinook last Sunday and Monday made a bad mess of the roads in all directions. Last Monday the sections of highway between here and Medicine Hat were under a foot of water and men opening up the ditches on either side were hip high in water. In several places the speed of the streams washed the gravel into the ditches and flattened the grade out from fence to fence.

The slightly colder weather Monday night stopped the freshets and although the highway is considerably damaged it is now quite passable.

The annual "Irish Concert" under the direction of Mrs. Joan Hayes, Medicine Hat, will be held in the Parish Hall on March 17th. Watch next week's "Review" for details.

Don't forget to keep Easter Monday free for the big A.Y.P.A. Whist, Bridge and Dance in the Cliff Hall. No Admittance except by invitation. Be sure to get your invitation Watch for further particulars.

During the high wind last Monday night a large plate glass window in A. Mackell's store and part of the glass front in A. McGimpsey's store were blown in. The crash created quite a scene but the damage has been repaired.

On the eve of his trip to England, R. S. Hodge was the guest of honor at a banquet at the Y.M.C.A. club, Medicine Hat, Wednesday evening. During the evening the club presented him with a token of remembrance, and extended wishes for a safe and pleasant voyage.

Douglas Quits Contract With Alberta Govt.

Poised Because Aberhart Engaged Major

Major C. H. Douglas has given notice to Premier Aberhart that he intends to terminate his contract as chief adviser to the Alberta government on Social Credit management.

The founder of Social Credit has written Mr. Aberhart that circumstances have arisen under which "it was impossible" for him to carry out his policies. Interference of other officials in the management had constituted a danger to Alberta and posed a breach of contract with himself.

Major Douglas is evidently peeved because Premier Aberhart secured the services of Mr. Major in an advisory capacity in connection with the financial situation of the province.

From this distance it looks to us that Major Douglas is not playing the game with Mr. Aberhart nor with the people of Alberta who have already paid \$6,000 for his advice and are willing to pay him as much more to help put into operation the system of which he is the father.

With the sweeping victory of the Social Credit party in this province last August and the overwhelming majority of S.C. members in the legislature all of whom are pledged to give Social Credit at least a trial, it appears rather strange that Major Douglas should turn down the best opportunity he ever had to put into practice the system he has been preaching for years. His excuses are trivial. Under the circumstances then, the only conclusion that any thinking person can come to is that Major Douglas is definitely decided that his proposed plan is a myth and cannot be made workable in this province.

Mr. and Mrs. Roy Chapman and family left this week for Calgary where they will reside in future.

G. G. Coote, former U.F.A. member, is suggested as Liberal leader to replace Judge Howman in the legislature.

Mrs. C. T. Hall entertained at the tea hour on Tuesday afternoon in honor of Mrs. R. S. Hodge, who is leaving shortly for the east country.

Reserve Easter Monday night for the big A.Y.P.A. whist, Bridge and Dance in the Cliff Hall. Watch the Review for further announcements.

In a motion of non-confidence in the present government at Edmonton Mr. Van Allan, Liberal member for Edmonton, stated that the budget proposed to the election promises of the government. He claimed that it sells the people of Alberta to the bondage of bond, odors; that it is a tax on food, clothing and shelter; that it is a means of deflation, and will decrease the power and that it is the anti thesis of Social Credit.

To Relieve Pain

Cobra Venom Is Said To Be Used Successfully

A new healing principle which trains pain into the habit of staying away, discovered in cobra, venom reported in the proceedings of the National Academy of Sciences by David Macht, of Baltimore.

Dr. Macht sought in cobra a non-habit-forming substitute for morphine. He found something which seemed to give the patient the pain instead of to the person.

The habit is in most cases for the pain to go away more and more with requirement of less venom to keep it away.

The new medicine is a dried crystalline secretion of cobra poison known as the scales of the venom. Dr. Macht and collaborators tried it on 115 persons in Baltimore. All were long-time sufferers from incurable pain, "and most of them had run the gamut of pain-relieving drugs."

There were favorable results for 86.7 per cent. Nine cases got no relief at all. Twenty-three got only slight relief.

"The usual therapeutic procedure," Dr. Macht reports, "was as follows: A dose of two or three grains of morphine (of venom) was first administered to ascertain whether the patient had any idiosyncrasy to the drug."

"If no undesirable effect was noted, a full dose of five mouse units was injected the following day. The amount was injected several successive days until a definite physiological effect (i.e., relief of pain) was noted."

"The dosage was then cut down in frequency, injections being given on alternate days. Later, the patient could be kept comfortable with one or two injections a week."

"In this respect cobra venom was strikingly different from morphine, which usually leads to habituation requiring increasingly frequent dosage."

"A powerful pain-relieving effect was undoubtedly produced in a large number of cases. Such an effect was noted in some of the most intractable conditions, as, for instance, in malignant tumors of jaw, spine and pelvic bones."

Church And State

Separation Of Anglican Church From State Will Be Decried

Action will again be delayed at this session of the British parliament on separation of the Anglican Church from the state, which many members of that communion desire.

Instead, the formal proposal, defended by the Rt. Rev. Herbert Henry Benson, Bishop of Durham, was referred to a meeting of churches to be held next summer.

The Bishop of Durham argued that the spiritual interests of the church, as well as its formal reorganization, required separation from the state.

Separation of the church and state would mean that the church would cease to be "Defender of the Faith," the title English kings have held as heads of the Anglican church since the days of Henry VIII.

Agricultural Problems

Active Projects Being Conducted On Experimental Farms

During 1933 a total of 185 active projects relating to practical problems of agriculture were conducted on the 184 illustration stations operated by the Dominion Experimental Farms. At certain of these stations the work is directed to a specific crop, as in the case of the raspberry berry work under way at Mission B.C.; the cranberry growing trials at Port Moody, B.C.; the burnout of soil problems at Nanaimo, B.C.

Two Lucky Provinces

Saskatchewan and Manitoba, of the western provinces were spared any abandonment of railway mileage since the Duff railway commission carried out its investigation two years ago, according to figures in The Financial Post. British Columbia had 49.89 miles and Alberta 49.89 miles abandoned was 272.69 miles.

Affected Their Memory

Letters, frozen for 2,000 years, have been revived and are now being used in a normal existence, according to the claim of Soviet scientists. The only thing that is troubling them is that they cannot remember very clearly the lessons they learned at their mothers' knees.

Since the European war there has agreed in Great Britain an unusual form of museum called "fossil mine," which is described as not being fatal, disgusting nor loathsome.

BRITAIN'S NEW WONDER PLANE IN FLIGHT

Novel System Of Barter

Italians Change Scrap Metal For Things To Movies

Fifteen kilos of scrap iron is the standard price of a box seat at cinemas in Rome, ten kilos of scrap iron for the orchestra, and eight kilos for the gallery.

Patriotic film fans may be seen trooping up to the box office bearing packages and sacks of scrap metal in return for which they receive their tickets.

In other Italian cities the weight of scrap metal which will buy admission into movie theatres varies, but nearly all have inaugurated this novel system of barter in order to promote the government campaign for scrap metal for the fatherland.

Young Hallitis and their still younger brothers, the "Boys of the Wolf," who are making intensive door-to-door canvasses for scrap metal, are now doing so with added zeal because their work entails not only an act of patriotism for which they are lauded by the Fascist authorities, but also earns for them the right to see their favorite movies.

In Rome, one large group of boys took away a section of a street car track which workmen had laid overnight. Laboriously but unmolested, they tugged the heavy rail into the body of a downtown movie house and offered it to the fatherland—in exchange for free tickets all round.

Police were called, but the boys were adamant, saying it was iron for the soldiers in Africa. Some Fascist officers with a sense of humor caught the rail to be taken back by laborers and prevailed upon the management to let the crowd of urinals see the film.

A Bird Lover

Canadian Post Says Robins Are The Friendliest Of Birds

Some birds have a sense of humor; the crow is a fine parrot-like jester; perches are the friendliest of birds and blue jays are the most difficult to befriend, said William Havelock Robb, the "poet of the Canadian birdland," on one of his periodic visits to New York.

He discovered the American jay, or fish hawk, was a parasite jumper. Nobody believed him until he caught a picture of an crowy making a "dead stick" landing.

"The crowy flies up over its nest and then stands almost still, wings out, its tail feathers in a slight curve. It waits its wings into an almost vertical position and drops to earth. It usually makes its parachute descent from about 40 feet in the air."

Robb now thinks that after 10 years or so of careful listening and mimicry he really is getting some of the bird songs into poetry.

Wife: "What did you do when the poor man collapsed in the bar?" Husband: "Finished up his beer and rushed in his aid."

Chemist reports that painting total surfaces requires special care, both in preparing the surface and in selecting paint for perfect adhesion.

"I wish," she sighed, "that we lived in a house where everything was done by touch."

And I wish," said her husband, "that I lived in a house that had buttons to touch."

Only three diseases cause more deaths in the world than do accidents of all kinds.

Locates Metallic Bodies

Pipe Lines Lost Forty Years Detected By Magnetite Eyes

A magnetic eye that can look through the ground and locate metallic bodies has been developed for the particular job of locating "lost" pipe lines. It can locate pipes with an accuracy of less than one diameter of the pipe in a horizontal direction and can determine its depth with a few per cent. of the total distance. It was developed in the master engineering department of the General Electric Company and recently located at Schenectady, N.Y. It located a pipe 100 feet from their supposed location and at a depth of seven feet. The pipes had been laid forty years ago and records of the location lost.

The detector consists of a very sensitive magnetic needle and a bar magnet which can be adjusted from horizontal angle and azimuth to neutralize the earth's magnetic field. The instrument is moved along a line across the supposed location of the pipe, and deflections of the needle charted. Maximum deflection takes place over the pipe. Two such lines and points give the course of the pipe. The depth can be determined by passing a small current through the pipe and carrying the return wire at varying distances over the instrument until the effect of the current in the pipe is neutralized.—St. Thomas Times-Journal.

Japanese Sex Span Higher

Average For Women Two Years Greater Than For Men

The average age of life in Japan is longer than has been generally believed. For men it is slightly over 44 years, for women it is 46. These are two and three years longer than were expected. The figures were disclosed by the Board of Statistics in Tokyo in announcing its fifth life table, which has just been published. The figures are based on the 1920 census. The average death rate is 30 per 1,000 population, according to the table.

Requid Leader: "I heard the battalion commander called you a 'blockhead.' Is that correct?" Rookie: "No sir, he didn't make that strong. He just said, 'Pull down your cap; here comes a woodpecker.'"

Note such as Brazil post, cashews, peanuts, pineapples and walnuts contain from 45 to 70 per cent. fat, and protein from 10 to 25 per cent.

The Hamites of northeast Africa, says the Field Museum, generally have dark brown or black hair, which is curly or wavy, and skin reddish to dark brown.

"It's about the old dogman," Sir James laughed. "The people give us that slogan, and I suppose we should thank you. But it isn't strictly true, you know. One in a while one gives us that slogan. The bulk of the matter is, the women get our men. We're constantly losing our men through marriage."

A man sent the service at 21, but he isn't allowed to marry for six years.

Despite the change modern life has made in the service, young men enlisting still like the Yukon. "It's about the old dogman," Sir James explained. "It's about the old dogman," Sir James explained. "It's about the old dogman," Sir James explained.

Among the products this nation would take from Russia under the agreement his scheme to exchange annually 100,000 head of Canadian livestock for various commodities from the Soviet Union.

Among the products this nation would take from Russia under the agreement his scheme to exchange annually 100,000 head of Canadian livestock for various commodities from the Soviet Union.

Experts are being asked to estimate the age of two human skeletons unearthed during excavation work at Hastings Castle, England.

"I wouldn't sit there, Jim—you're sure to get hanged."

Making Ethiopian Quail

Italian Soldiers Grow Beards To They Will Look Fierce

The undergrowth of the Ethiopian with its being mirrored on the faces of Italian officers and soldiers. Beards are the fashion and tens of thousands of them have converted quail-checked boys into men.

A visit to the Italian front is a strange revelation. You talk to what appears a bearded veteran and he admits shyly he is 21. A young, shaven chap, wishing to help transport a dispatch, called the men must have known the tough soldier because his beard covered the whole forehead.

Officers and soldiers have summed up the advantages and disadvantages of beards in wartime. Advantages are:

1.—Shaving with dull razor blades is obnoxious.

2.—They make innocent-looking soldiers seem so fierce that Ethiopian quail before them.

3.—They aid clear thinking, because stroking the beard seems to pull thoughts from one's brain like thoughts from the back of a striped cat.

Disadvantages:

1.—They catch in the belts of machine guns.

2.—They are likely to be rubbed by Ethiopian quail as one sleeps.

3.—They are a good chance of being singled as one hovers over a camp fire on a cold night.

There apparently is something about beards in war. A London correspondent who went to the front, beardless, returned be-whiskered. A Frenchman, however, returned be-whiskered, started the good folk of Amara with goat-like appendages.

Canadian Mounted Police

New Recruits Ask For Assignments In The Hinterland

Modern machines have worked great changes in the famous Canadian Mounted Police, but the youngsters of the service still ask for assignments to far-off outposts where there is lots of space and much less.

Sir James Macpherson, commissioner of the Royal Canadian Mounted Police, in Washington for a wild life conference, said that, while the police were still mounted, it was men usually rode other things than horses now.

Three hundred horses are used in the Canadian Mounted Police, automobiles, boats and motorcycles can't penetrate.

Asked about the old slogan, "The Mounties always get their man," Sir James laughed.

"The people give us that slogan, and I suppose we should thank you. But it isn't strictly true, you know. One in a while one gives us that slogan. The bulk of the matter is, the women get our men. We're constantly losing our men through marriage."

A man sent the service at 21, but he isn't allowed to marry for six years.

Despite the change modern life has made in the service, young men enlisting still like the Yukon. "It's about the old dogman," Sir James explained. "It's about the old dogman," Sir James explained.

"I wouldn't sit there, Jim—you're sure to get hanged."

Promising Year For Export Poultry

Good Demand For Frozen Chickens On British Market

"Possibly Canada has never enjoyed a more promising outlook in an export way for any agricultural product than is offered for Canadian poultry, particularly frozen chickens on the British market," states a recent issue of the Egg and Poultry Market Report published by the Dominion Department of Agriculture. "There is, as a matter of fact, very little competition in the way of finished milked poultry, such as Canada should be able to supply."

Britain herself is making very little effort in this direction while the foreign countries Poland and Hungary are the nearest competitors at present. Poultry from Canada and the other Dominions enters the British Isles duty free while that from other countries has to face a tariff of three pence, or six cents a pound.

—There is no recommendation in the recent report of the British Reorganization Commission on the Import of Eggs and Poultry that any duties be imposed on poultry and no suggestion of quotas or other similar restrictions.

Canada's market wants is a heavily, fatted chicken equivalent to the Canadian grades of Mink and Mink. There is a good chance of advantage to Canada shipping to the British Isles anything other than finished poultry. Considerable demand was done last year for the reputation of Canadian poultry through the relatively large quantities of frozen chickens from Canada that were exported without any counterbalancing effect of higher grades in the same shipment."

Men With Brains

University Of Toronto Co-Eds Risk They Prefer Men Of Intelligence

"Give us men with brains, not brawn," clamor University of Toronto co-eds, and the university has been invited to a representative session of the women undergraduates revealed the Taran type of boy friend is definitely out of fashion.

They declared they want men of intelligence, capable of mass, logical opinion, able to express themselves lucidly in good English.

Other qualities sought: A romantic, a man of sentimentality, social poise and ease of manner, personal neatness, proficiency in dancing, a sense of proportion and a certain amount of physical strength, physical fitness, money and sophistication or experience of the world.

On the other hand, the girls' enemies of women students were men with a line, chiselers, date breakers, heavy drinkers, long lounge hangers and cheap suits.

A minority insisted on dates owing or at least driving, automobiles.

Every Precution Taken

Strict Examinations Required Before English Can Drive Trains

At the present time, every person involved in the handling and operation of trains must pass a written examination on a set of rules consisting of more than 200 questions. And a 100 per cent. correct answer is the only one acceptable to the railway management before a person is permitted to engage in this task.

These very precautions make the headlines "Train Collides" a rare occurrence nowadays.

On the other hand, we have the modern motor car with the speed of a railroad flyer built into it and what are the requirements necessary for the majority of people to operate one? . . . practically nil. . . .

Miss Maxine Brownlee of Calgary is at present in town visiting Mr and Mrs. C. Barr

Mr. and Mrs. Jack Potter of Medicine Hat spent Wednesday in town the guests of Mr and Mrs. R. S. Hodge.

Mr and Mrs. L. Henderson have moved to Fifth Street and are now occupying the house recently vacated by Mr and Mrs. Simpson.

STAMPEDE MEETING
NEXT TUESDAY NIGHT

A General meeting of the Redcliff Stampede Association will be held in the Legion reading room on Tuesday evening, March 10th at 8:00 o'clock. All interested are requested to attend as important business will be discussed.

CARD OF THANKS

Mrs. Kearney and Mr. and Mrs. Waters wish to thank their friends for the many kindnesses shown during the illness of the late Mr. Kearney and for the expressions of sympathy in their bereavement.

Here and There

Vancouver is holding this year the Golden Jubilee celebration of its founding in 1861. Some of the features planned include a series of events of all kinds, including, a special performance of Shakespeare's "Midsummer Night's Dream" in Stanley Park, a performance of "The Mikado" in the Indian Village, a Hawaiian village, special decorations and illuminations all over Vancouver. Celebrations will reach their peak in the first two days of July.

At the annual Burns dinner held at the Empress Hotel, Victoria in February at which over 300 Burns lovers took part, the royal Scotch haggis was brought over from Vancouver and was carried in steaming hot on a silver platter by Miss Owen, Dewar and piped around the Empress dining room by Pipe-major Donald Cameron. Guests were received from Scotland, Africa, Australia, the United States and London, England.

Stating emphatically that success depends on luck, Captain Charles H. Hudson, D.R.O., and R.N.L. commander of the boat for two years of the war, had a hard job supervising the Active Club International at Hotel Vancouver recently of the entire crew of the steamer. They thought that skill, courage, resourcefulness and composure did with success after hearing of the capture of the ship.

Recently the Royal York Hotel, Toronto held a Cherry Pie Contest, which was open to everybody and gave ten prizes in order of merit and the good housewives of the Cherry Pie were all about. The judges of course had their work cut out for them as they had to do a bit of cutting for themselves.

"It is a pity every British Columbia business man can not find it possible to visit the Far East, particularly Japan," said C. A. Cotterell, assistant general manager, British Columbia, for the Canadian Pacific Railway, just back from a trip to the Orient. Mr. Cotterell thought a visit would be an education, enlightening and of incalculable value in a practical sense.

Two prominent British realtors in Kobe are fighting a losing battle against a sacred pine tree which their fear is about to fall on their residence, according to passengers arriving in Victoria recently on the Empress of Japan. They can't get it felled because it is believed if that is done, a pestilence will strike the district.

"The Canadian Pacific's biggest liner, the 42,000-ton Empress of Britain, to be designated 'cabin' ship following the abolition of 'first class' designation by the North Atlantic Conference, will continue in operation as a high class, high speed, de luxe liner," William Baird, steamship passenger traffic manager of the Canadian Pacific, said recently.

At one end of the Dominion the Eastern International Dog sled Derby at Quebec, Feb. 29-31 hit the high spots in winter sport and at the other end of the Empire, the "Golden Golf" tournament at Victoria, February 17-21, both sponsored by the Canadian Pacific Railway and each showing the versatility of the Canadian climate, since both were indubitably and entirely successful.

Baiting has reached unprecedented levels this winter with an average of 2,500 shrews taken week-end trips from Montreal to nearby mountain resorts all season and with similar figures available from all over the Dominion.
